## RESERVATION APPLICATION FORM NEW SOLAR HOMES PARTNERSHIP

### 1. Applicant Name and Contact Information

Applicant Name:

Street Address:

City:

State:

Zip Code:

Contact Name, Title, and Phone and Fax Numbers:

### 2. Project Description

Please give a general project description including the site address of development:

Please check below what type of housing development this reservation is for:

- ☐ Housing Development with 6 or more units installing solar on 50% or more of residential buildings
- ☐ Housing Development with 6 or more units installing solar on less than 50% of the residential buildings
- ☐ Small Developments (under 6 residential dwelling units)
- ☐ Custom Home(s)
- ☐ Development where solar is an option\*\*
- ☐ Affordable Housing

Please note that only housing developments with 6 or more units installing solar on 50% or more of residential buildings will receive a 36-month reservation. Affordable housing will also be eligible to receive a 36-month reservation. All others will receive an 18-month reservation.

\*\*If solar is an option, your reservation can only be for up to 10% of the residential buildings in the development.

No. of Systems Meeting California Flexible Installation Criteria:

No. of Systems with Orientations, Tilts or Shading that Do Not Meet the California Flexible Installation Criteria:

No. of Systems on Residential Buildings Meeting the Tier I Energy Efficiency Criteria:

No. of Systems on Residential Buildings Meeting the Tier II Energy Efficiency Criteria:

Total No. of Residential Buildings in Development:

Total No. of Residential Buildings with System Installations:

Anticipated building start date:

Anticipated building end date:

### 3. Equipment Purchase

Have you committed to purchase or have purchased PV equipment?

- ☐ Yes (Please fill out the all the sections below.)
- ☐ No (Please skip Section 3 and complete all others.)

Generating Equipment	Quantity	Manufacturer, Model (Equipment must comply with Energy Commission Lists of Eligible Equipment)

Inverters	Quantity	Manufacturer, Model (Equipment must comply with Energy Commission Lists of Eligible Equipment)

4. Estimated PV Performance and Cost

Average expected performance per residential building (CEC-PV Calculator output):	Please provide the Seller's Name and Address below. Seller must be registered with the Energy Commission. If the seller is not registered, seller must submit a completed NSHP-4 to the Energy Commission.
Estimated solar system cost (equipment & installation) per residential building:	
Estimated solar system cost (equipment & installation) for development:	

5. Electric Utility

☐ PG&E   
☐ SCE   
☐ SDG&E   
☐ BVE

6. Declaration

The undersigned party declares under penalty of perjury that the information in this form and the supporting documentation submitted herewith is true and correct to the best of his or her knowledge and acknowledges the following program requirements to reserve funding (applications that do not have all of the following acknowledgements checked off will not receive a reservation):

- ☐ Incentives are based on the expected performance of the systems installed.
- ☐ Builders must achieve at the minimum Tier I Energy Efficiency to be eligible for the program.
- ☐ Site of PV system installation cannot be changed once a reservation has been approved.

The undersigned party further acknowledges that he or she is aware of the requirements and conditions of receiving funding under the New Solar Homes Partnership (NSHP) and agrees to comply with all such requirements and conditions as provided in the Energy Commission's NSHP Guidebook and Overall Program Guidebook as a condition to receiving funding under the NSHP. The undersigned party authorizes the Energy Commission, during the term of the NSHP, to exchange information on this form with applicable electric utility servicing the project to verify compliance with NSHP requirements.
